

I have been a licensed amateur radio operator for 29 years and am extremely concerned that broadband over powerline will cause significant interference to all of us that use the HF spectrum daily, both for pleasure and service. Japan saw how destructive BPL would be to communications and chose not to implement the service. I believe it would be tragic for all users of the HF spectrum to activate BPS services in the United States and I plead with the FCC not to allow this to happen.

Sincerely,

Craig M. Sande, M.D.
